## SUMMARY

Recently graduated B.Tech in Artificial Intelligence and Data Science with hands-on experience in Python, Machine Learning, and data-driven problem solving. Proficient in supervised learning, model evaluation, feature engineering, and data preprocessing using Pandas, NumPy, Matplotlib, and Scikit-learn. Seeking an entry-level ML Engineer or Python Developer role to learn and grow.

## SKILLS

|                   |                                                                                                                           |
|-------------------|---------------------------------------------------------------------------------------------------------------------------|
| Languages & ML    | Python, SQL, Machine Learning, Supervised Learning, Unsupervised Learning, Classification, Regression                     |
| Libraries         | Pandas, NumPy, Matplotlib, Scikit-learn, PyWhatKit                                                                        |
| Database          | MySQL, Relational Database                                                                                                |
| Tools & Platforms | Jupyter Notebook, Google Colab, VS Code, PyCharm, MySQL Workbench, GitHub                                                 |
| Concepts          | Data Preprocessing, Feature Engineering, Model Evaluation, Statistical Analysis, Predictive Analytics, EDA, Data Cleaning |
| Soft Skills       | Analytical Thinking, Problem Solving, Team Collaboration, Time Management                                                 |

## PROJECTS

### CareHub – Smart Hospital Management & Billing System [GitHub Link](#)

- **Python & MySQL** based system to manage patient records and appointments
- **Automated billing** with **QR payment** and **WhatsApp bill delivery** using **PyWhatKit**, reducing manual effort by ~80%
- Designed **relational database schema** for structured patient and billing data storage

### Fake Instagram Profile Detection using Machine Learning [GitHub Link](#)

- Built end-to-end **ML classification pipeline**: data preprocessing, feature engineering, model training and evaluation
- Applied **supervised learning** (Logistic Regression) achieving **94.9% accuracy** using Scikit-learn
- Analyzed key features like **followers/following ratio** and **profile completeness** to distinguish fake accounts

### Gold Price Prediction using Machine Learning [GitHub Link](#)

- Developed **regression model** on historical financial data with full **data preprocessing pipeline**
- Analyzed **financial indicators** like oil price, silver price, and exchange rates as input features
- Achieved **R<sup>2</sup> score of 0.84** using Pandas, NumPy, and Scikit-learn on real-world datasets

## EDUCATION

|             |                                                                                                     |            |
|-------------|-----------------------------------------------------------------------------------------------------|------------|
| 2022 – 2026 | <b>B.Tech in Artificial Intelligence and Data Science</b><br>Mahendra College of Engineering, Salem | CGPA: 7.20 |
| 2021        | Class 12th, Saraswathi Matric Hr. Sec. School                                                       | 76.6%      |
| 2020        | Class 10th, Saraswathi Matric Hr. Sec. School                                                       | 73.4%      |

## INTERNSHIPS & COURSE

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Aug 2025 – Jun 2026 | <b>Machine Learning and Python Course – Livewire</b> <ul style="list-style-type: none"><li>• Hands-on training in <b>Data science</b> and <b>Machine Learning</b> techniques</li><li>• Performed <b>data cleaning</b>, <b>data preprocessing</b>, <b>feature engineering</b>, and <b>model evaluation</b></li><li>• Worked with <b>NumPy</b>, <b>Pandas</b>, <b>Matplotlib</b> and <b>Scikit-learn</b></li></ul> |
| Aug 2024 – Sep 2024 | <b>Full Stack Intern – Crescent Infotech</b> <ul style="list-style-type: none"><li>• Developed front-end and back-end components using <b>HTML</b>, <b>CSS</b>, <b>Python</b></li><li>• Gained experience in <b>web app deployment</b>, <b>Flask</b> basics, and <b>code optimization</b></li><li>• Used <b>Git</b> for version control and collaborative development</li></ul>                                  |
